Who We Are
The Defense Technical Information Center (DTIC®) is THE premier provider of DoD technical information. DTIC serves as a vital link in the transfer of information among DoD personnel, DoD contractors and potential contractors and other U.S. Government agency personnel and their contractors. DTIC is a DoD Field Activity under the Under Secretary of Defense for Acquisition, Technology and Logistics, reporting to the Director, Defense Research & Engineering (DDR&E).
Why We Do What We Do
• Provide direct information support to the warfighter.
• Leverage the multi billion dollar investment in DoD scientific and technical research.
• Prevent unnecessary or redundant research from being performed at taxpayer expense.
How We Do What We Do
• DoD-funded researchers are required to search DTIC's collections of technical reports and summaries of ongoing research to ensure that unnecessary research is not undertaken.
• DTIC has leading edge expertise in hosting Web sites, and has developed over 100 Web sites for other Defense programs.
• DTIC manages Information Analysis Centers which help customers locate, analyze and use scientific and technical information in a specialized subject area.
Announcements
• DTIC 2006 Conference Preliminary Agenda & Conference Registration
• 2006 Technical Reports (TR) Database on DVD now available.
• New DTIC Web Search Site
• Paul Ryan Appointed New DTIC Administrator
• Research and Engineering (R&E) Portal

Air University Library Index of Military Periodicals

- Cooperative Effort: **DTIC with Air University Library**, Maxwell, AFB, AL
- **Access to online bibliographic database of military and aeronautical periodicals**
- **Links to journal sites for access to articles**
- **Citations: 1988 - present**

http://www.dtic.mil/dtic/aulimp/index.html

The Air University Library's Index to Military Periodicals (AULIMP)

The Air University Library's Index to Military Periodicals is a subject index to significant articles, news items, and editorials from English language military and aeronautical periodicals. The Index contains citations since 1988 and is updated continuously. A comprehensive list of all journals covered by AULIMP since 1949 is available as the Historical Index of AULIMP titles.

The Defense Technical Information Center (DTIC) hosts this w -based version of the AULIMP via its Scientific and Technical Information Network (STINET) w ervices. There are numerous alternatives for achieving comprehensive and accurate search ts including:

- Search the entire Index
- Begin with a listing of articles by subject headings
- Begin with a listing of articles by periodicals.
- Begin with a listing of articles by authors.

Several of the AULIMP journals have Internet web sites (l individual journal home pages to see exactly what each publi makes available since many do provide full-text articles. For your convenience, DTIC has ind the URL addresses of many of these sites so they will appear in your search results.

AULIMP & SCAMPI: Search Tips

Search Tips:

Listed below are searching tips that you may find helpful during your search:

Search Tips	Example
Put phrases in quotes	*"Base Realignment"*
Try complete sentences	*What is the DoD policy on sexual harassment?*
Use AND for required words	*paintless AND aircraft*
Use + for required words	*+paintless +aircraft*
Use - to exclude words	*MIA -Vietnam*

Finding One or More Terms

To find one or more terms, type them in the search box.

Example:
personnel finds results that contain the word

cargo carrier
finds results that contain the word "cargo"

Review Search Tips for advice on searching.

Virtual Reference Service

Ask a Librarian….

at DTIC

QuestionPoint: Virtual Reference

DTIC participates in Cooperative Virtual Reference Service.

[Ask a Librarian]

- **QuestionPoint**, the Cooperative Virtual Reference service, was developed by OCLC and the U.S. Library of Congress and is supported by institutions worldwide.

- This digital, collaborative reference service is available 24/7 (24 hours per day, 7 days per week) and allows libraries and information centers to expand reference services with shared resources and subject specialists around the world.

- DTIC is a participating member of the following QuestionPoint cooperatives: 1) **Global Reference Network**, a worldwide group of libraries and institutions committed to digital reference, and 2) **DDLRS - Defense Digital Library Research Service**, a 24/7 electronic reference for Department of Defense libraries.

- Questions submitted by patrons via this Web-based digital reference service may be referred to the Global Network or to the consortium of DoD libraries for a response.

- DTIC users with specific queries for DTIC Reference Services should contact ref@dtic.mil or call 703-767-8274 or 1-800-225-3842

multiprocessing/multiprogramming envir
Work with and assist programmers, ana
teleprocessing batch applications. Aids
changes/enhancements. Analyz

distinct mode workload requirements.
ialists in operating and testing
and testing teleprocessing systems

- **Computer Specialist:** Computer Programmers and Computer Systems Analysts have responsibility for managing, supervising, and performing the work necessary to design, implement, maintain, and modify systems for solving problems and accomplishing work processes by the use of digital computers and perform specialized activities associated with development and design of data processing systems.
- **Librarian:** This series includes positions involving work that requires specialized knowledge to perform a variety of duties involved in the acquisition, maintenance, and circulation of scientific and technical information. A knowledge of computer hardware and software is essential. Applies a professional knowledge of library and information science in the preparation of cataloging entries, acquisition of reference sources, acquisition of materials, and application of library procedures.
- **Technical Information Specialist:** Technical Information Specialists are primarily concerned with the direction, administration, development, coordination, and performance of work involved in processing and transmitting scientific, technical, or other specialized information. Requires a broad knowledge of one or more professional, scientific, or technical disciplines or fields of interest to understand the significance and relationship of the concepts and ideas contained in the information area and a practical knowledge of documentation or library techniques.
- **General Physical Sciences:** DTIC has a requirement for physical scientists skilled in analyzing the content of scientific and technical literature. The work primarily involves the formulation and control of specialized vocabularies

Who We Are
The Defense Technical Information Center (DTIC®) is THE premier provider of DoD technical information. DTIC serves as a vital link in the transfer of information among DoD personnel, DoD contractors and potential contractors and other U.S. Government agency personnel and their contractors. DTIC is a DoD Field Activity under the Under Secretary of Defense for Acquisition, Technology and Logistics, reporting to the Director, Defense Research & Engineering (DDR&E).
Why We Do What We Do
• Provide direct information support to the warfighter.
• Leverage the multi billion dollar investment in DoD scientific and technical research.
• Prevent unnecessary or redundant research from being performed at taxpayer expense.
How We Do What We Do
• DoD-funded researchers are required to search DTIC's collections of technical reports and summaries of ongoing research to ensure that unnecessary research is not undertaken.
• DTIC has leading edge expertise in hosting Web sites, and has developed over 100 Web sites for other Defense programs.

Who is eligible to register for DTIC® Services?
You are eligible to register if you:
are an employee of a DoD organization (civili
Reserves on active duty), DoD contractor o
are an employee of another U.S. Federal Go
Government contractor
are a researcher of a university or college funded DoD o
agency for conducting research throughout the U.S.
are a participant in the Small Business Innovation Research
Technology Transfer (SBIR/STTR) program
are a faculty member, staff member, or student of Historical
Universities (HBCU), Hispanic Serving Institutions (HSI), Trib
(TCU) and other Minority Institutions (MI)
Review eligibility requirements for DTIC users.
Proceed with online registration.

Free Training for DTIC Users

Searching DTIC Databases using Private STINET

- This three-day, hands-on class covers the content and methods for searching and retrieving scientific and technical information using Private STINET. Private STINET is DTIC's web based access to a variety of information resources, including unclassified citations to classified documents. It is a newly merged system that combines the features and collections of Secure STINET and the search capabilities of Web Enabled DROLS (WED). The Technical Reports Bibliographic Database, Research Summaries Database and Independent Research & Development Database are discussed at length. The focus of this course is to explore the information sources available through Private STINET; to develop effective searching strategies to retrieve information from DTIC's databases; to provide practical search tips to effectively use the systems' unique search features; and provide instruction for ordering documents and electronic bibliographies.
